*To those who accept their destiny: happiness. To those who deny it: GLORY*

### **Anime Punch: 4th Impact**

*For 5 years Anime Punch has strived to be a "college-level" anime convention, both socially and academically. We work hard to bring in professors and grad students to host informative and thought provoking panels and lectures. We do not censor our speakers or limit the topics of discussion. We put study guides for key panels and events online a month before the convention. We also throw some of the best parties, have the wildest events, and the least repressive attitude towards behavior of any convention. Lastly, we expect our attendees to live up to this expectation. If you don't have any passion, a sense of humor, intellectual drive, basic maturity, and a wild side then we don't want you. This con is for those who watch the anime, discuss the anime, debate the anime. People who tell you what they like, they tell you why they like it. For people who listen and learn, for people who get excited and passionate, for people who rock out, get loose, and have fun. We don't dumb things down for teenagers, but rather expect them to rise to our level. Age is nothing, attitude is everything. If you can live by these ideals, then join us under this flag of freedom!*
